

**GSI Environnement**, a business unit of EnGlobe Corp., has been specializing in the research, development and implementation of organic waste management (OWM) programs since 1987. Environmental services include composting, direct land application, site remediation and biomass cogeneration, as well as the commercialization of eco-product in Québec and Ontario. GSI manages close to one million metric tons of organic waste annually through its various beneficial reuse outlets, transforming them into value-added products.
